You've saved lives in the village of Garbey Malo Koara 4 - Ceg

To Whom it May Concern:

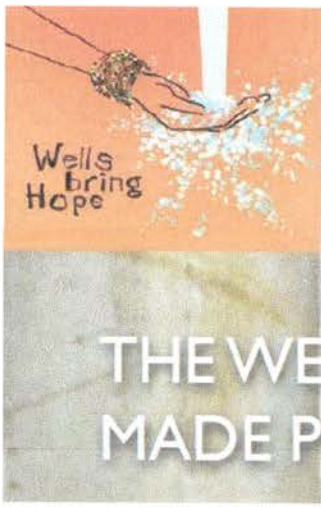

We are incredibly grateful for your support of Wells Bring Hope and want to tell you about the impact of your donation. Thanks to your generous gift, a well has been drilled in the village of Garbey Malo Koara 4 - Ceg in rural Niger. You can take pride in the fact that the well you made possible has already begun to dramatically transform the lives of everyone in the village, especially the children.

The enclosed report, provided by our partner World Vision, will tell you a little bit about what we're doing to improve the quality of life in Garbey Malo Koara 4 - Ceg. Beyond the tangible reduction in child mortality and improved health, there is now hope for the future.

There are still roughly 11,000 villages awaiting the transformation that has taken place in Garbey Malo Koara 4 - Ceg. I hope that we can count on your continued support, either now or in the future as we strive to bring safe water to everyone in Niger.

With great appreciation,

Barbara Goldberg
Founder and President

IN PARTNERSHIP WITH

Garbey Malo Koara4- Ceg, Niger

Thank you for your support. The villagers of Garbey Malo Koara4- Ceg are experiencing clean drinking water for the first time, and a healthier future is now a reality. A new well, drilled by our partner, World Vision, is providing 1,475 people with an accessible source of clean water. Of these, 547 people will walk 500 meters or less to the water point. This means that women and girls no longer have to walk for hours every day to fetch water.

Water, sanitation, and hygiene committees, comprised of community members, are trained and committed to managing the well and ensuring the health of the village for generations to come. Thanks to their focus on community empowerment and sustainability, most of World Vision's wells established more than 15 years ago remain operational.

We are multiplying the health benefits of clean water by addressing sanitation and hygiene in Garbey Malo Koara4- Ceg. Activities include helping people build and maintain latrines and providing education on the importance of handwashing. Water, sanitation, and hygiene interventions can dramatically reduce child disease, malnutrition, and death, while increasing school enrollment, attendance and performance, especially among girls. The interventions also multiply income at the household and community level.

Thank you for helping us save lives with safe water! The people of Garbey Malo Koara4- Ceg are so grateful for what you have done.
